

**With a Packard Bell
computer, you're never
home alone...**

...because Packard Bell is
the computer the world
comes home to.™

Bring home a Packard Bell computer, and enter a new world of family fun. Why? Because no other computer fits your family like Packard Bell. Only Packard Bell gives you:

- **KiddoNet™**, a secure, fun and educational Internet play area.
- **Packard Bell Navigator™ Assistant**, giving you one-touch access to Internet, CD player, fax and more.
- **CyberCoach™**, which teaches you by actually performing common computer tasks – while you watch and learn.
- **CyberTrio™**, which lets you protect the computer system and important files from your little household “hackers.”
- **CyberWarner™**, which protects critical system files to keep your computer running smoothly. It's like home security for your home computer.

Maybe that's why *Family PC* magazine gave Packard Bell a “Recommended” rating, saying “solid hardware, a family-friendly software bundle, and a great price make (Packard Bell) an exceptional value and a solid choice for most families.”*

See for yourself at your authorized Packard Bell dealer, and visit our “Home Alone 3” website at www.packardbell.com/ha3.
